Crows Nest Pass Bonspiel Here Jan. 17

Many Entries Expected From Other Towns as Local Rinks Getting Into Condition For Keen Competition.

Sam Moores, president of the Crows Nest Pass Curling Association, announced the opening date of the seventeenth annual bonspiel, to be held in Coleman, as Monday, January 17, play continuing throughout the week.

In case a thaw should set in, the bonspiel will be postponed to await colder weather.

Entries are expected from Fernie, Cranbrook, Blairmore, Bellevue, Pincher Creek and Lethbridge, as well as Coleman rinks. Competitions in which prizes are to be awarded are International, Lethbridge Brewery, Grand Challenge, Trites-Wood and West Canadian. The Greenway Points Cup will be put into competition for the first time, when individual curlers will match their skill at the draw, knock-out, drawing the pot and various other fine points of the game.

The association's annual banquet will be held in the Grand Union hotel, at which the election of officers will be held. In advance notices received by the local club secretary are a true indication of the number of entries to be received, the bonspiel is going to be one of the best in the association's history. Accommodation is also likely to be at a premium at the local hotels.

Excels' Drub Fernie Juniors

Fernie Juniors played an exhibition game against the "Excels" on New Year's day and were soundly defeated by an overwhelming score of 13-5. Fernie surprised everyone, including themselves, when they skated off the ice at the end of the first period leading 2-1. They slipped two goals behind in the second period, trailing 7-5, and were seldom in the game in the third. Coleman scored as they pleased, scoring six goals without a reply from Fernie. A return game will be played at Fernie in the near future.

Blairmore Trounce "Excels" Score 8-3

"Excels" winning streak was halted on Monday when Blairmore Bearcats gave them a drubbing by a score of 8-3.

Flare-up of tempers, especially in the second period, when the referees were hard pressed to control the play, was mainly responsible for the heavy score. Attendance showed an increase. The spectators enjoyed the spills and thrills of this hectic game.

With their victory Blairmore's lead in the intermediate league stands at four wins and no defeats. Coleman is second.

Winter Visitors

Many beautiful and uncommon birds have been noticed around the woods during the last few bright days. Some of these are jays and nut-crackers, the latter type being very tame. Mr. Harry Gardner on 7th street managed to entice some of these birds from the trees around his home to come and eat bread crumbs from his hand.

529 Montana Avenue
Santa Monica, Cal.

Christmas number of The Journal received and it is a credit to you and the old town. Would like to have paper sent direct. Happy new year.—The Morrisons.

The many friends of Mr. and Mrs. Morrison in the Pass towns will reciprocate their good wishes.

Coleman Hockey Team Will Play Four Home Games Next 10 Days

Hope to Improve League Standing in Home Series. Jenkins and Ainsworth Highest in Local Points.

"There's a silver lining—," yeh, you know the song! Coleman fans are anxiously looking for that same silver lining to determine a change in this losing streak which holds Canadians in its grasp. 9-2 against Treill ouch! that hurt! Rossland trims them the next day 7-4. Sixteen goals scored against them in two games. It would appear that Coleman needs a number of new men who can really burn up the ice with speed as well as having stick-handling ability. Canadians are slow, there's no arguing the fact, and until they are able to hold their own with their opponents in speed they are at a disadvantage.

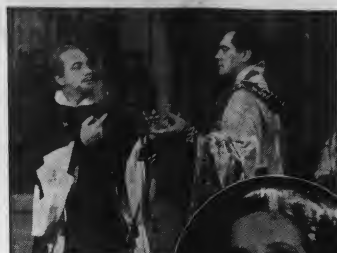

Human nature is a funny thing. For the past few years Canadians have run roughshod over their opponents, and last year especially, interest was on the wane simply because it was a foregone conclusion Coleman would win and people refused to pay admission to see them beat inferior opponents. They wanted to see real hockey like that played in the Kootenay league. As a result the team barely managed to make ends meet last year.

This season Coleman sought entrance into the West Kootenay league and were successful. Canadians have yet to win their first game in this league with the season well advanced. Some people now complain that they are tired of seeing Coleman lose. Actually the reverse from last season. They won't support the team when it wins and they refuse to support it when it loses.

It takes a lot of money to sponsor a team in the Kootenay league, due to traveling expenses, so why can't these few fans be good sports long enough to help Canadians until they hit their stride and start winning. After this road trip which finished on Wednesday, Coleman will be at home for their next four games which should enable them to get into the winning column. Kimberley will have to show better ability than they have so far, being only two points up on Canadians.

The Journal employs workers who live in Coleman, who pay taxes in Coleman, who do business in Coleman, whose interests are in Coleman.

Sleeping Beauty Organist for Richard II

Virginia Oman, the "Sleeping Beauty" of 1931, who slept for six months and woke "feeling fine" and with an ambition for a musical career. She plays on a Hammond Organ, the new instrument which uses no pipes or reeds, the incidental music during Maurice Evans' stage production of Richard II. This production is booked to play this season across the United States and Canada.

Above are Maurice Evans, Producer, in the title role, and Ian Keith as Bolingbroke, as they appear on the Toronto stage, in late December, and early in the New Year at Winnipeg, Edmonton, Vancouver and Victoria. Inset is the Hammond Organ which is manufactured in Canada by Northern Electric Company, Montreal.

A Modern Tragedy --A New Start

The following story was discovered in The Journal office, dated May 13, 1936. There is no signature attached, and no clue as to who wrote it; but it will prove interesting.

I met them at Coleman, Alberta, last year. They had been farming in southern Saskatchewan and were headed for British Columbia. Their earthly belongings were crowded into two covered wagons which were being pulled by four scrawny horses. Behind them staggered half a dozen poor looking cattle driven by a little girl on horseback. She grinned and waved to everyone who passed. Her dark hair was protruding from under a tattered straw hat, and her faded blue overalls were covered with layers of dust from the road.

She was viewing the snow covered mountains and the green trees for the first time. The grass was green and small streams of water gurgled down the hillsides. This was a virtual paradise in contrast to the barren, burnt country to which she had been accustomed. She marveled at this wanton waste of water. To her water had been a precious fluid to be conserved and valued, the lack of which had caused ruin to her father's fields of grain.

Year after year the drought continued. Each spring hopes were high. The spring work was done and seeding finished. Weeks passed without rain, the fields were parched. Every passing cloud brought a ray of hope and sometimes the sun was blotted out for a few moments, but the cloud passed them by. The tiny shoots of grain turned a light yellow, then a crisp brown. They had witnessed another failure which was added to the failures of previous years. They had reached the end of their endurance. What could they do?

After much deliberation, they resolved to make the long trek to British Columbia. Long days of grinding labor under a boiling summer sun and long winters of bitter frost had meant nothing to them. Their lives had been dedicated to this cruel land. In return for their labors they had asked little, sufficient food, a few simple comforts, and freedom from the gnawing fear of insecurity. Behind them lay their blighted hopes and the tender memories of more fruitful years. Their destination was a vague somewhere. They were enthralled by the majestic beauty of the surrounding mountains and their eyes shone with expectancy. The little girl waved good bye and they were away on their weary trail.

I can visualize a log cabin in a fertile valley. The smoke from the stone chimney is curling up through the trees and fat cattle are grazing on the hillsides. Some land has been cleared and is being prepared for the first crop. Water is plentiful and a beautiful crop is assured. This has been the happy ending of a modern tragedy.

Merchants' advertising copy in The Journal will be read and believed because it is in good company. It appears in The Journal.

Chapman's Rink Won New Year's Bonspiel

Defeated Holstead's Rink in Final—Bonnie and Ledieu in Consolation Final to Be Played on Sunday

The change of newspaper reports from the fervid political partisanship of 25 years ago, to the present unbiased presentation of news regardless of a paper's own policy, was commented upon by Lieut.-Col. R. F. Parkinson, managing director of The Ottawa Journal, in a talk to the Ottawa Junior Board of Trade. In Canada this change was largely due to the co-operative news-gathering services of The Canadian Press.

Chapman's rink, skipped by Jim Anderson, showed surprising strength in the local club's new year's bonspiel as they won their way into the final where they trimmed the Holstead rink 10-8. More credit is reflected on their victory when two of the team's members failed to turn up. Wm. Chapman, skip, having to withdraw at the last minute due to an injured hand. Undaunted by this setback, Anderson and Alan Brown were asked to aid in the skipper's behalf. With hopes high, Skipper Anderson guided the good ship "Chapman" through rough and stormy waters to a safe harbor in the final.

Frank H. Graham's Appointment As Postmaster

Recognition of Faithful and Courteous Service Is Heartily Approved By Coleman People.

For many years the late Frank G. Graham was postmaster, and following his death applications for the appointment were advertised for by the Post-office department. His son Frank for a number of years has carried on the work to the entire satisfaction of Coleman people, and it is a tribute to his good service that his appointment was confirmed at Ottawa just prior to Christmas.

His experience in the railway mail service, and for some years in Penticton post-office under the present postmaster there, D. J. McIntyre, who was the first postmaster in Coleman, stood him in good stead to carry on the work in Coleman office. Having to deal with people of many nationalities, makes this office more difficult and trying than the average town office; all have received equal courtesy and many little favors have been given, apart from post-office regulations.

A peep behind the scenes would reveal that many hours of labor above those called for in his regular duties as postmaster have been given in the service of Coleman people, much of it being taken for granted. Yet it is always given with a smile, and this office holds an excellent reputation among postal officials for general efficiency.

He has also made time to participate in community affairs. As school trustee for two years, and as a faithful member of St. Alban's church, in which his mother was so active, and in other local activities, he has been energetic.

The feeling is that his appointment is well deserved, and The Journal joins with Coleman people in expressing their appreciation of his appointment. He is a Coleman boy who attended the first school established here, and it is very gratifying to know that he will continue his good work.

Eight Remington typewriters and eight Underwoods have been purchased by the school board through the Journal office, acting as local dealers for Remington-Rand, Ltd.

Holstead's rink fought an uphill battle in their first two games, being behind until the eleventh end when they tied the game up on both occasions and went on to win.

22 rinks competed, Blairmore and Bellevue being represented by four rinks each. Due to lack of practice, the outside rinks were badly handicapped and failed to win one game in the main event. Bonnie, of Blairmore, has won his way into the final of the consolation and he will meet Ledieu on Sunday at 3 p.m.

Personnel of the winning rinks in the final included: J. Anderson, skip; S. Kryguy, Alan Brown, J. Balloch, T. Holstead, skip; J. Nash, A. Balloch, J. McIntyre.

United Church

Attention of the congregation is drawn to the fact that on Sunday morning the Sacrament to the Lord's Supper will be observed. This is the regular winter communion and all members, adherents and friends are urged to be present. The young people who are communicants are especially urged to attend.

The regular meeting of the managing board will be held in the afternoon. At this meeting the date of the annual meeting of the congregation will be fixed.

Year-end donations and gifts are coming in and all are asked to help as generously as possible so that a satisfactory balance sheet may be shown.

Nazarene Mission

An old time gospel mission on Main street, west. Missionaries: C. Helen Mooshian and Gunnell Berglund.

Sunday services: Morning worship at 11 a.m. Evangelistic service at 7:30 p.m.

Week-day services: Tuesday evening at 7:30 praise, prayer and testimony meeting. Friday evening at 7:30, gospel service with Bible study. Special music at every service. You are cordially invited to attend.

There will be a special week-end revival meeting from Jan. 15-17 inclusive with Rev. D. Swarth as the evangelist.

Among those returning to the University of Alberta on Sunday were: Alan Short, Bill Borrowes, Alwyn Haysom, Raleigh Martin, Joe D'Andrea, Wilma Halliwell and Margie Freeman.

The Gasoline Hazard

With the coldest, lengthiest and, therefore, the most hazardous part of the winter yet to come, sixteen coffins, containing the tortured bodies of victims of the fire demon have been lowered into the ground and hospital doors have opened to admit another twenty injured by the same agency, in Saskatchewan alone this season, and this is the pre-Christmas toll in one of the prairie provinces.

In the absence of figures it is safe to presume that comparable losses have occurred in the sister provinces of Alberta and Manitoba. Indeed stories of tragedies appearing in local and metropolitan newspapers afford the evidence that such is the case.

These graves give silent testimony to the risks annually incurred in a cold climate during the winter season, and, in most cases, are mute evidence of the truth of the old adage "familiarity breeds contempt"; in other words they are, in the majority of instances, the result of carelessness—a lack of appreciation, or forgetfulness, of the dangers involved in the handling of fire.

Danger In The Homes

Statistics show that the great bulk of these life and property losses and injuries have occurred in homes and in most cases in homes on the isolated farmstead or in the small villages and towns, where fire protection equipment is either entirely absent or at a minimum and where trained fire fighters are completely absent.

Investigations conducted by, and information received by provincial and local authorities and fire insurance companies show also that the greater number of these disastrous conflagrations occur in the early morning after fires have been lighted and adult members have left the house for outside chores, leaving children and sometimes women still sleeping in their beds. For the latter it means death by smoke suffocation or cruel flames.

In this season's fires, gasoline is indicted as one of the most potent agencies of death, injury and loss of home and contents. In some cases, it has been used in mistake for coal oil to lash dying embers into quick flame or to speed up a newly laid fire. In other instances the use of this dangerous fluid for dry cleaning operations has brought irreparable disaster upon an unsuspecting household.

Carelessness To Blame

In other words, in nearly every instance, somebody's carelessness or negligence can be blamed for the dire results which have followed. There has been a violent explosion, a death-dealing fluid has been sprayed in all directions and the doctor, the coroner and the undertaker have been called in to perform the obsequies. In the twinkling of an eye a happy household has been converted into a shambles, no less disastrous because disaster was unsuspected a moment before and no less horrible than the streets of Shanghai after the visit of a Japanese bomber.

When details of these disasters appear in cold print subsequently, wonderment at the carelessness and folly of mankind speedily succeeds the shock occasioned in the mind of the reader by graphic descriptions of the horrors of such disaster and the suffering they entail.

The wonder is further accentuated by the thought that these disasters have followed so close on the heels of the annual fall fire prevention campaigns, when well directed efforts were made to render citizens fire conscious, apparently all to no avail.

A Grain Of Comfort

There is some comfort, however, in the discovery that these fire-prevention campaigns are bearing some fruit and are being particularly in the fertile and impressionable minds of the youth of the country, for in the past few years, there has been marked reduction in the number of conflagrations resulting from the misuse of matches by children—an indication that children, at least, are learning and remembering valuable lessons imparted in the schools during fire prevention week.

These results of the campaign in the schools among the children give rise to the hope that the loss of life and property due to fire will be materially reduced in the future within the next two or three decades when they succeed the present generation as the masters and mistresses of the households in the rural districts. They at least serve to demonstrate that the words of admonition and advice which form a component part of these campaigns are worthwhile and give rise to the belief that later they will bear fruit in a substantial reduction in fire losses where such are caused by carelessness or neglect.

In the meantime, one can only suppose that fire losses attributable to carelessness with gasoline will continue more or less unabated, unless some measure can be found to make the use of gasoline for lighting fires and for other uses in the home impossible.

Trying To Keep Peace

New Minister To Palestine Will Crisis Of Abolition Resulted In Have Plenty To Do

Twenty years ago in Palestine the Turks were fleeing before British, French and Italian troops led by the khaki-clad General Allenby. But their sweeping bayonets left a con- Kingdom to London will help to raise the prestige of the English dynasty of Britain and Jews. Under the mandate of the League, the British to rule was raised over Palestine and British colonial expertise was brought to bear on the problem. Out of its experience Great Britain now proposes a division of the Holy Land, both Jews and Arabs to be offered their own small mandate area. The plan still pending, and the population still content. So Sir Charles Tegart, doubtfully dour of terrorism in India, arrives in Jerusalem on the 20th anniversary of Allenby's triumphal entry to take up reorganization of the Palestinian police. He'll be the apex of a wedge to separate dissident Arabs and Jews. Christian Science Monitor.

Attains Ripe Age

Ontario Woman Has Lived Under Six British Sovereigns

Mrs. Mary Jane Bogart, who says she is just "living on borrowed time," celebrated recently the 103rd anniversary of her birth.

Mrs. Bogart has a word for the young girls of today. She feels they do not wear sufficient clothes. If they did they would live longer and be healthier, she thinks.

Born in County Fermanagh, Ireland, she has lived under six British sovereigns, being born three years before Queen Victoria ascended the throne in 1837. She came to Canada when she was 11 years old and lived in Morewood, Ont., not far from Ottawa, for the last 92 years.

Due to its many indentations, Alaska's coastline measures 35,000 miles—greater by 10,000 miles than the earth's circumference.

Empire Is Stronger

Imperial Airways Have Set 1940 As Date For Inauguration

Imperial Airways have set 1940 as the goal for inauguration of a regular trans-Atlantic passenger air service between Great Britain and Canada. Aviation officials say the service may be launched sooner, but the experimental program of the ocean route calls for a further series of flights under varying weather conditions and paying passengers will not be carried until every phase of the proposed service has been thoroughly explored.

To affirm of experience the trans-Atlantic route holds no greater hazards than some of the longer-distance flights on Empire services already established. There has actually been a rush of volunteers for the privilege of being selected as prospective Atlantic pilots.

Started As Pitboy

Thomas Greenall Rose To High Position In England

Thomas Greenall, who began life as an oppressed pitboy in the last century and rose to be one of the founders of the Miners' Federation of Great Britain, died recently at Penbury, Lancs., England.

Greenall as a pitboy dragged a coal wagon for 12 hours daily with a chain around his waist. Later he became a miner and a prominent union official. He sat as a Labor member of Parliament from 1922 to 1929 for the Farnworth division of Lancashire.

The Day Of Jingle Bells

Jingle bells will soon be gone, it is feared at Belleville, Ontario. A city harness maker had to search through his stock for a half-hour before unearthing a set of bell harness for a customer, the first person to demand bells for his horses in three years.

The temperature of the sun is about 11,000 degrees Fahrenheit.

Hawaii hasn't a single roadside billboard.

Announcing

TWO NEW FORD V-8 CARS FOR 1938

THE DE LUXE

THE STANDARD

Ford offers two new cars for 1938—the Standard Ford V-8 and the De Luxe Ford V-8. They are different in appearance—but built to the same standard of mechanical excellence—on the same 112-inch wheelbase.

Because people liked our 1937 car so well, they bought more than of any other. They liked its looks, its smooth performance, and the way it handled. We have improved on that car in the newly styled Standard Ford V-8.

But some folks wanted still more size and style, with the same fundamental Ford advantages. For them, we have designed a new De Luxe line.

The De Luxe Ford V-8 Sedans are longer with more room, larger luggage space, and finer appointments. De Luxe cars are equipped with the 55-horsepower Ford V-8 engine. They provide more

motoring satisfaction at low Ford prices.

The Standard is even lower priced than the De Luxe. It is a brilliant, modern car. It has graceful new lines and well-tailored interiors. It gives you the same basic advantages of the 55-horsepower Ford V-8 engine.

Before Ford made V-type 8-cylinder engines available to every one, they were used only in expensive cars. Since then, four million Ford owners have learned the genuine enjoyment of driving an 8-cylinder car with all-round economy. The low prices of the De Luxe and Standard cars make it easy for you to step into the V-8 class.

FIT YOUR CAR TO YOUR NEEDS

With two distinct designs, two body sizes and two price ranges, you'll find a 1938 Ford car to fit your personal needs exactly. Whatever one you choose, you get time-

proved Ford V-8 performance. Whatever price you pay, you get a car built soundly to serve you well. . . . That's the Ford way.

FOR LOW DELIVERED PRICES SEE YOUR LOCAL FORD DEALER

De Luxe Ford V-8 models are Coupe, Tudor Sedan, Fordor Sedan, Convertible Coupe, Club Coupe, Convertible Club Coupe, Phaeton and Convertible Sedan.

Standard Ford V-8 is available in three models: Coupe, Tudor Sedan and Fordor Sedan. Ford sells a fully equipped car at the lowest possible price. The prices on De Luxe models include twin tail lights, two windshield wipers, two sun visors, twin electric horns, cigar lighter, De Luxe steering wheel, glove compartment clock and lock, chrome wheel hubs, in addition to front and rear bumpers and guards, spare wheel and tire and tube, tire lock, and headlight beam indicator.

Prices on Standard models include front and rear bumpers and guards, spare wheel and tire and tube, tire lock, one tail light, one windshield wiper, one sun visor, cigar lighter, headlight beam indicator, and two horns.

Atlantic Air Service

Imperial Airways Have Set 1940 As Date For Inauguration

Imperial Airways have set 1940 as the goal for inauguration of a regular trans-Atlantic passenger air service between Great Britain and Canada. Aviation officials say the service may be launched sooner, but the experimental program of the ocean route calls for a further series of flights under varying weather conditions and paying passengers will not be carried until every phase of the proposed service has been thoroughly explored.

To affirm of experience the trans-Atlantic route holds no greater hazards than some of the longer-distance flights on Empire services already established. There has actually been a rush of volunteers for the privilege of being selected as prospective Atlantic pilots.

A Real Anniversary

Oshawa, Ontario, was recently the scene of about as happy an event as could be asked for. Twin brothers, Ernest by name, were married 50 years ago in a double wedding. With all four participants in that "away back when" occasion still hale, hearty and happy, their golden anniversary was joyously celebrated on December 14.

Brown bread gives more food value than white bread, because the bran contains vitamins, mineral matter and cellulose.

You will find poetry nowhere, unless you bring some with you.

Gave Life For Pup

Coyote Showed Parental Devotion Not Lacking In Animals

Sport of pioneers days—coyote hunting with hounds is coming back in southern Alberta, but a modern twist is added to-day. The hunters chase behind the speedy hounds, following the tricky coyotes in automobiles. It is not only a popular sport again, but a profitable one.

Pelts sell at \$10 to \$12 and some real prime ones bring as much as \$20 a skin. Youths of the foothills ranged country, speeding over snow-covered fields, are combining business with pleasure.

Parental devotion is not missing in coyote hunts. The story is told of a big grey coyote that eluded hunters for years. Then, a son brought death to the father.

Chased by greyhounds the parents were well ahead but the coyote pup lagged behind, winded and soon to fall victim to the dashing hounds. The old fellow deserted his life-long mate and drew the dogs away from the worried offspring. Mother and pup escaped. "Dad" was caught and killed.

Box Of Relics Stolen

A wooden box containing relics from the tomb of King Tut Ankhamen of Egypt, addressed to the Brooklyn Museum in New York, was stolen while in transit in London. The box held a mummy ax, knife, beads, bracelets, a vase and other trinkets.

When peeling apples, expose them to the air as little as possible. This prevents discoloration.

NEW

And Far Handier Than Older Ways!!!

Here is the most useful waxed tissue package you've ever seen. This new pack contains 45 sheets of silver white waxed tissue. Through the top of the pack is a metal eyelet for hanging on the wall. Inside, the tissue is held in an ingenious grip so that you can withdraw one sheet at a time by simply reaching out with one hand. "Presto-Pack" thus becomes the handiest of all kitchen aids. You will wonder how you ever managed without it.

Survey Party In Northern Quebec Is Rescued By Aeroplane

Moosonee, Ont.—Six men of a 15-man starvation crew, matched from death New Year's day in the frozen muskeg country of northern Quebec, were landed safely in Moosonee.

Pilot G. R. Spradbro, who found the survey party weak and foodless beside the Missakabi river near the men here late Sunday. Saturday he brought in Leo Bernier, most emaciated of the Quebec government crew that lived 39 days on the flesh of 14 rabbits.

Spradbro, piloting a Dominion Skyways plane, left at 2 p.m. on his second flight to the survey camp, about 60 miles southeast of Moosonee. Ontario's end-of-the-world town, James Bay, and 13 miles from the provincial boundary. He returned two hours later.

Six high-spirited but weakened surveyors got out the plane and were taken to the Roman Catholic Mission where they will be cared for.

The seventh passenger was Rodolphe Houde, who engaged the party in August to survey the country between Lake Evans and the boundary—96 miles distant with lake and muskeg. Houde organized the search and stayed overnight with the men after they were found Saturday.

"This is the happiest day of my life," he exclaimed. "I had worried about those boys every minute since I found they had missed the food cache. It is wonderful we have found them."

So weak they staggered and no happy they cried, the French-Canadian surveyors crowded around the plane that found them after a brief search.

Since Nov. 22, when their food supply ran out and they were unable to find a food cache placed a month earlier, the party, headed by Lieut. Col. Rene Guenot, had hoped that they would be sent. They had no way of sending out word of their plight.

Piloting one of two planes despatched from Smeethere, Que., three days ago, Spradbro saw the waving men Saturday as he flew over their camp in 28-below-zero weather. Spradbro raced back to his Nottaway river base, loaded the plane with food and made a landing near the camp.

"They threw their arms around our necks and cried," Spradbro said on his arrival here late New Year's day.

"The men all came out to the plane to greet us but some were so weak we had to help them walk back to their tents."

Leaving Houde to care for the remaining 14 and feed them, Spradbro headed for Rouyn, 200 miles south, intending to fly along the Nottaway river. Stormy weather conditions forced him to turn around and he dashed instead to Moosonee. Bernier was placed in the care of Dr. W. L. Tyrer, who said the emaciated Frenchman was in no danger.

Killed In Mine

Nanaimo, B.C.—Tudor Sainsbury, 10-year-old miner, was killed at Northford mine here here. Caught under a fall of coal, he was suffocated.

Chinese Blow Up Factories And Other Japanese Property

Shanghai.—Destruction of Japan's valuable interests in Shanghai proper continued as Chinese worked with torch and dynamite to wreck mills and other properties belonging to Japanese armies could reach Tsingtao.

From that Shanghai port an exodus of foreigners was in progress. Fearing disorders and possible spread of destruction to non-Japanese property, a foreign vigilante corps was organized.

Japanese seizure of Tsingtao was considered inevitable, although latest military reports indicated no Japanese land forces were nearer than 100 miles.

Americans reaching Shanghai from Tsingtao described conditions in interior Shanghai as chaotic.

The army of General Yu Hsueh-Chung, previously garrisoning Tsingtao, had withdrawn rapidly to the southeast to escape the Japanese. Gordon and was reported to have

Ship War Material

United States Report Shows Heavy Exports For 1937

Washington.—Foreign trade reports of the commerce department said that "enormous" exports of war materials were keeping United States sales abroad at a high level and providing a cushion for declining business at home.

At the same time, they estimated final figures for 1937 would show that American firms and individuals sold abroad at least \$200,000,000 more in commodities and manufactures than they purchased in other lands.

This excess of exports, long termed a "favorable" balance of trade, would represent a gain of some \$165,000,000 over 1936, but otherwise would be the smallest "favorable" balance in the last six years.

Asked for an opinion of the year's foreign trade developments, one department expert said: "It's been a great year for preparation for war." He added exports of iron and steel, especially scrap, copper and aircraft "have been enormous" and sales of gasoline have been "keeping up pretty well, too."

Says Home Raided

Secretary Of Quebec Communist Party Makes Complaint

Montreal. Stanley Hyerson, self-described secretary of the Quebec Communist party, told newspapermen that provincial police had raided his home and that of E. Dube, chairman of the provincial party, and seized quantities of literature.

Hyerson said all his books and other literature had been taken away by three provincial officers who said the matter would be returned immediately after officers had a chance to examine it for Communist propaganda.

"More than 40 books and 100 or more pamphlets and periodicals were confiscated at my place," said Hyerson, "together with a large collection of material relating to the 1937 rebellion in Upper and Lower Canada, used by me in preparing my recent book on that subject."

At provincial police headquarters officers declined to discuss the matter and would not even confirm the report of the raids.

Foreign Language Programs

B.B.C. Making Effort To Offset Anti-British Propaganda

London.—The first of foreign language programs planned as an antidote to anti-British propaganda was broadcast by the B.B.C. January 3 from 6 to 6:15 p.m.

The broadcast was in the Arab tongue, with a news review following. Inaugural speeches by Prince Seid al Islam Hussein, son of the Imam of Yemen; the Egyptian charge d'affaires here; the minister of Saudi Arabia and Iraq; and Sir Bernard Bello, governor of Aden.

Daily programs will be broadcast thereafter during the same period.

No Option Taken

Report Denied That Britain Had Bargained For Canadian Wheat Crop. London.—The ministry for defence co-ordination and the Board of Trade denied published reports they had negotiated an option for Great Britain to the entire Canadian wheat crop to ensure Britain's food supply in time of war.

The offices of Vincent Massey, high commissioner for Canada, and of the Canadian Wheat Board reported they were unaware of any such transaction between the British and Canadian governments.

London.—The Daily Herald (Labor) stated the United Kingdom had engineered an option on the entire Canadian crop to ensure part of the British food supply in time of emergency.

The Herald said the option had been engineered by the Board of Trade and Sir Thomas Inskip, minister of defence co-ordination. It added that Whitehall experts and the Canadian Wheat Board had been in secret negotiation on the matter for some months.

The Herald said that should the option ever have to be taken up it would cost Great Britain about £100,000,000 (\$500,000,000) together with £5,000,000 which it said was the price of the option.

The newspaper's article continued: "This is part of a great scheme for importing and storing emergency supplies."

"Sir Thomas Inskip is working out details with the food (defence) department of the Board of Trade and the air raids precautions department."

The paper said unused ports of the south and west coasts of England, and in Scotland, will become receiving centres; reserves of tinned food, bulk supplies of edible fats are to be built up and "provisions for adequate granary accommodations is being worked out also."

"Storage will have to be in areas inaccessible to air attack since apart from direct bomb hits, wheat is equally contaminated by poison gas," the paper concluded.

Paris Strike Ends

Threat To Mobilize Workers Seem To Have Been Effective

Paris.—Labor leaders and cabinet ministers announced strikes of 120,000 Paris workers had been called off.

The Paris municipal council, acting through Interior Minister Mark Dornay, agreed to give the workers a living allowance at a compromise figure between their demands and the previous council offer.

Paul Morel, secretary of the Public Services Workers Union, said the strikers would go back to work, ending the tie-up of Paris transportation, gas, light, and water services, which had threatened more serious complications.

The agreement was reached in the face of a government threat to mobilize all workers and force them to return to work, as soldiers. Most strikers are reservists in the French army.

The compromise promised workers living allowances of 70 francs (\$23.31) monthly to meet the rising cost of living instead of the 100-franc allowance strikers asked. Previously the municipal council had offered monthly allowances of 50 francs.

A conference of union leaders with Dornay, Finance Minister Georges Bonnet and other government leaders resulted in the compromise.

PURGE VICTIM

The last purge in the Soviet Union resulted in execution of eight prominent officials, one of them Avel Yenukze, ambassador to Turkey, and former secretary of the Central Communist committee. Yenukze was a close personal friend of Dictator Josef Stalin until his arrest on charges of "terroristic activities and systematic espionage" for an unnamed foreign nation.

Study Infantile Paralysis

Proposal For a Nation-Wide Long-Range Attack On Disease

Toronto.—Second only to cancer, infantile paralysis presents a problem which the Canadian Medical Association proposes to attack through nation-wide, long-range research. More than 4,000 Canadians were afflicted in a five-month epidemic late this year.

The polio epidemic epidemic to give it its scientific tag was the worst in Canada's history. In the United States approximately 10,000 persons were stricken.

Most of Canada's 4,000 sufferers were children under 14. The epidemic raged from June through October, leaving more than 1,000 patients in splints or on frames for many months due to after-effects.

While aimed chiefly at cancer research, the Canadian Medical Association's proposal to co-ordinate medical and scientific effort in a branch of the present national research council also embraces study of infantile paralysis.

Will Return To Cuba

Machado Says His Personal Happiness Demands That He Die There

New York.—Gerardo Machado, Cuban president who fled for his life in the summer uprising of 1933, said he will one day return to Cuba because his personal happiness demands he die there.

"I intend to follow the advice of my physician, and within 20 days shall go to Bermuda, where the climate is warm and I have good friends," Machado said in a prepared statement, handed to reporters who he received in the Murray Hill hospital.

Machado, who speaks no English, said through an interpreter he was "feeling better but not too strong."

For more than four years the former "iron man" dictator of Cuba had fled from country to country to escape extradition proceedings instituted by the government which succeeded him.

Spanish Insurgents Are Trapped By Government Forces

Quebec Wage Increase

Fair Wage Board Issues Order To Assist The Underpaid

Montreal.—The province of Quebec Fair Wage Board issued an order providing for wage increases for workers whose pay now is below minimum standards in specific categories, and a five to 10 per cent. advance in minimums now legally fixed. The board action will affect nearly 80 per cent. of the province's 670,000 workers, including 155,000 women.

The announcement said the new order covers every worker in the province in any industrial or commercial establishment, office workers, clerks, clinical assistants, nurses, workers classified as "domestic" in commercial establishments, such as cooks, waiters, chambermaids, elevator operators, male and female teachers, employees of theatres or places of entertainment. It includes also "any day laborer working at any work whatsoever, manual or otherwise, and for whom no provision has been made in the present ordinance."

Wage minimums previously set under the defunct women's minimum wage board are extended to male workers, sole exceptions being domestic servants privately employed, agricultural workers, consultants and workers already covered by collective labor agreements under the Act Respecting Workmen's Wages.

Aid For Injured

Ontario's Roadside Samaritans Have Been Organized

Toronto.—Fame of Ontario's roadside Samaritans organized to give first aid to injured motorists, has spread around the world and their example is being followed in British Columbia, Quebec and nearly half of the United States. In addition the plan may be adopted next year in Nova Scotia, New Zealand and India.

The garage workers and farmers who took first aid training during the past five years in order to qualify as voluntary Samaritans in Ontario's rural areas, were credited to-day with having saved three lives on one provincial highway during the first 10 months of this year.

Organized at rural garages 12 to 15 miles apart on the Ontario highway between Windsor and the Quebec border, the voluntary workers' first aid posts are ready 24 hours a day to aid the injured. Between January 1 and October 31 they gave medical treatment to 125 accident cases, 30 per cent. of whom were "serious emergency cases."

U. S. Administration Urges Restrictions On Economic Power

Washington. Interior Secretary Harold Ickes, continuing the Roosevelt administration's attack upon "big business," asserted that the power of concentrated wealth "must be compelled to conform to our laws" at the coming session of congress.

An "irreconcilable conflict" between "the power of money and the power of the democratic instinct" has reached such an intensity in recent months, he said, that it is "clear that it must be fought through to a finish—until plutocracy, or democracy—or until America's 60 families, or America's 120,000,000 people win."

His broadest speech was the third assault upon "big business" to come from within the inner circle of the White House. Two such addresses were delivered previously by Robert H. Jackson, assistant attorney-general. All are regarded as a prelude to a drive for anti-monopoly legislation at the session of congress opening Jan. 4.

Luke Jackson, Ickes accused concentrated economic power of going on a strike against the administration, or threatening to do no business unless governmental restraints upon business are removed. Referring throughout to capital as "America's 60 families," he said:

"To the 120,000,000 people of the United States, they have made the threat that unless they are free to speculate without regulations to protect the people's money; unless they are free to accumulate through legal

tricks, by means of corporations without paying their share of taxes; unless they are free to dominate the rest of us without restrictions on their financial or economic power; unless they are once more free to do all these things, then the United States to have its first general sit-down strike—not of labor—not of the American people—but of the 60 families and of the capital created by the whole American people, of which the 60 families have obtained control."

He called attention to a recent labor board decision against Henry Ford. He said the board "charges Henry Ford, the beneficent, with what amounts to a refusal to comply with a duly enacted statute." Coupling the automobile magnate with Thomas Girdler, of "Little Steel," and James H. Rand, Jr., of Remington-Rand, the secretary called upon business to purge itself of "its Fords, its Girdlers and its Rands," before it presumes to tell the people what they should or should not, do about troubles caused by labor laws.

Asserting that the "60 families" brought on the depression which began in 1929, he said the people called upon the government to intervene and the last was successful in restoring prosperity.

"And last spring," he continued, "government had the business of the country turning over so well that it thought it could safely heed the pleas of big business to government to abandon the economic initiative."

The original number of insurgents who resisted the government cleanup of Teruel was placed at 3,000 troops and as many civilians.

Hendaye, Franco-Spanish Frontier.—Insurgent detachments said their troops, supported by a heavy artillery and aerial bombardment, smashed through government lines northwest of Teruel and captured a number of positions.

The insurgent general offensive, described as "the most extensive operation" of the 17-month-old war, insurgent reports from Salamanca said, occupied the village of Salamanca and had closed in on Ciudad. Adjutant government positions also were taken.

The communists asserted retreating government troops left more than 900 dead.

Government advances from Barcelona admitted: "We have lost several positions" in the western sector.

Murder Syndicate

French Authorities Check Heavy Correspondence Seized At Villa

Versailles, France.—After examining voluminous correspondence seized in the Villa of Eugene Weidmann, German minister resident here from Saskatchewan, police said they might send an agent across the Atlantic to check on possible connections of the "murder-for-profit" syndicate.

Nearly 500 letters were found in the villa, many written in English and coming from addresses in Canada and the United States.

A majority were from women in various countries with whom Weidmann got in contact through advertisements.

DELBOIS SOUNDS OUT KING CAROL

History may have been in the making when this picture was taken, since it was during the recent visit of Yvon Delbois, French Foreign Minister, to Roumania, to confer with King Carol on Germany's demands for colonies or for more room to expand in Europe.

THE COLEMAN JOURNAL

H. T. Halliwell, Proprietor.

Published Every Thursday at Coleman, Alberta. Membership in Canadian Weekly Newspapers Association and Alberta Div. C.W.N.A.

THURSDAY, JANUARY 6, 1938.

THE GREATEST joy of Christmas, to young and old, is the home-coming of the young people from school, college or university, bringing the vigor and liveliness of youth to enliven the older people. Christmas is a holiday in which people of all classes and ages share in the cheer and goodwill which rises to the surface as at no other season of the year. Would that the Christmas spirit were more to the fore throughout the whole year. Christmas remembrances remain with all more vividly throughout life than any other, brightening our lives and spreading that mellowing influence which helps all to forgive their enemies.

AS we grow older, time appears to pass much more quickly than in our younger days. We begin to feel that there is so much to do and so little time in which to do it. By the time this paper is being read, almost a week of the new year will have passed, the daylight hours will be lengthening and we will be fairly launched on 1938. There is always a goal to be aimed at, and the most important in our local circle is to try by promoting the friendly spirit to make our community a better place in which to work and live. May the new year bring a fair measure of happiness to all our readers and friends.

OCCASIONALLY readers of The Journal remark that we have had little to say in recent weeks concerning provincial politics. Though admitting that everyone is entitled to his own opinion and is free to express it, do not imagine that we are indifferent to the dangers that threaten democratic government in Alberta. There may be a lull in heated controversy at the present time, possibly owing to the season of goodwill to all, but we are as vigilant as ever in keeping our eye on the political weather-cock. Our remembrance of attempts to gag and boycott the press and to infringe on the rights of the people will never permit us to become indifferent. United action by all parties opposed to the present government is necessary to remove the threat of dictatorship and coercion, and people should not be lulled into a feeling of false security by Premier Aberhart blaming and abusing others for his failure to do those wonderful things which he promised in 1935. Alberta will not be governed much longer by Prophetic Bible institute propaganda.

AN ANONYMOUS friend with a sense of humor sent us a newspaper clipping extolling the benefits of carrying pieces of nutmeg in your pocket. It is supposed to ward off rheumatism, paralysis, fever and other evils. We since learned that people really do carry pieces of nutmeg on their persons, and claim to benefit from it, for did not Professor Coue state that if you repeat every day "In every way I am getting better," eventually you will be better. Our impression of nutmeg always was it was a good flavoring medium for rice puddings, beer and other refreshments. This nutmeg cure-all brings to mind that many years ago there was placed on the market a contraption consisting of a small metal cylinder which you placed in a jug of water alongside your bed; this had an insulated cord leading to a strap and a metal disc which you fastened around your ankle, and while you slept you received the life-giving vigor which the small cylinder in the water was supposed to contain. The only cure effected was that of the patient's imagination. Possibly Aberhart may have got some of his ideas of the credulity of human nature by seeing some of these contraptions, and how the public fall for them.

An Unexpected Find

(The following story by Mr. Tom Clarke, of Macleod, will be read with interest. He was one of the original mounted police and has lived at Macleod since resigning from the force. His son Tom is employed at International Coal & Coke Co. Ltd.)

When the grade for the Crows Nest Pass railway was being raised an unexpected find came to light, an ancient canon ball, about two and a half inches in diameter, and deeply pitted with rust, being unearthed. The contractor on that particular section took it down to Macleod where it excited much interest and comment, the editor of the paper commenting briefly on the find. That article was read by an old Montanan who remembered hearing a story to the effect that many years previously an armed troop of American cavalry, equipped with a mountain howitzer, or small bore cannon, had driven a band of disaffected Crow Indians out of his state and far into the north, following them along the base of mountains until what is now known as the Gap was reached, and firing at them whenever opportunity offered. Closely pursued, the Indians continued their retreat, making in the direction of an isolated mountain to the right of the valley. Reaching their objective they entrenched themselves amongst the rocks and prepared to sell their lives dearly.

The nest or eyrie they had selected proved to be impregnable and they were able to hold out against the attacks of their blue clad enemies, but at length food supplies gave out and refusing to surrender, they died miserably.

The cannon-ball recovered had without a doubt been one of perhaps many fired by the troops in their pursuit of the fleeing natives.

This story was in circulation in Southern Alberta half a century ago.

LOCAL AND GENERAL

Mrs. Gladys Thompson left on Monday afternoon to commence her duties as teacher in a school south of Pincher Creek.

On Jan. 7, at 9:30 p.m., John I. McFarland, who was recently chosen as president of the executive council of the Unity Movement in Alberta, will make his first public announcement on the subject of Unity.

"Sinbad the Sailor," a technical feature, will be shown at the Palace theatre on Tuesday and Wednesday, Jan. 11 and 12. "Pop-Eye," so well known to film-goers, is being highly featured in this program.

Mr. E. D. Battum, town auditor, was appointed returning officer for the town and school elections to be held in February. Mr. Ford, secretary of the council and school board, has been granted three months leave of absence, as his health necessitates a rest from duty.

Mayor and Mrs. Pattinson left on Wednesday via Lethbridge and the southern route for Santa Monica, Cal., where they will spend a month, and later proceed to Victoria, B. C., and will be absent about two months. They were accompanied by their daughter, Mrs. Harold Reid, and her husband, who will return to Vancouver after the visit in Santa Monica. During Mayor Pattinson's absence Councillor Haygood as deputy mayor will preside over the town council.

ANNOUNCEMENT

Mr. and Mrs. D. C. Robert announce the marriage of their second daughter Jean, to Mr. Clifford Picard of Lethbridge, son of Mr. and Mrs. E. Picard, of Blairmore. The wedding took place in Blairmore, Jan. 2, Rev. R. Upton, of Bellevue, officiated.

WORKING TOGETHER

"THE WORLD we live in is a social order. That is why it is so impractical for a man to live to himself. There is no man or woman today so gifted that they do not need those around them to make their work more perfect and their life more worth living. There would have been no Ironsides without Oliver Cromwell; but on the other hand how many of Cromwell's ambitions would have been realized without the Ironsides? Though industry is spreading throughout the country, the university and the plough are closer than most of us realize. The farmer and the manufacturer are not two different orders of being."

"Each one needs the other, and unless farmers and manufacturers—and labor and capital also—realize that they are not enemies but allies, there can be no national strength or progress."

The answer is simple; the attic of Smith's house is insulated with Johns-Manville Rock Wool Home Insulation, so that heat doesn't leak out through the roof.

That also explains why Jones uses 10% more fuel than Smith, yet his house is cold and drafty—and why, in summer Smith's house is up to 15 degrees cooler than Jones'.

Let us tell you about it—and how easily you can finance J-M Home Insulation for your own home under the easy terms of the J-M "1,000,000-to-Lend" Plan.

Our Feet on the Fender

STEPHEN LEACOCK says that people of other countries suppose Canadians to spend their Winters huddled along the U.S. border, trying to warm their feet on the fender of the 49th parallel, while their backs shiver in the icy blasts from the North Pole. Snow and cold are thought to put a stop to our efforts for six months of the year.

OF COURSE farmers know how much work there is to do in Winter. Anyone with some stock to tend, for instance, has a job 365 days of the year. Lumbering is most active in Winter and mining suffers no Winter slackening. Still, the criticism of Canada as a place of part-time employment has an element of truth in it.

ANY Canadian industry, therefore, which is particularly active during the Winter is a boon to Canada. For over thirty-two years Dominion Textile Company has been operating plants for the manufacture of primary cotton textile goods in towns of the Province of Quebec. During all that time the average employment has been maintained at a fairly consistent year-round level. If there has been any season more active than another, it has been the Winter season—when Canadians are popularly supposed to hibernate. And if there is one season less busy than another, it is Summer.

DOMINION TEXTILE COMPANY can reasonably claim that it contributes towards year-round evening-up of Canadian production and employment. It acts as a counter-balance against seasonal unemployment.

INSPIRING PROGRAM

EVERY FRIDAY NIGHT
On a National
Coast to Coast Network

WORLD HAPPENINGS BRIEFLY TOLD

Lord Nelson's writing desk has been presented to the nation by Joseph H. Jacobs, London ship owner, in celebration of his 70th birthday.

Lucian Desbiers, Montreal newspaperman, has been awarded a silver medal as a French language prize by the French academy, it was announced.

Newton D. Baker, who as United States secretary of war mobilized the greatest army in the history of his country, died in Cleveland after a heart attack.

State medical services brought the United Kingdom's death rate down to 9.2 per cent, in 1936 as compared with 13.2 in 1910, says a ministry of health report.

Sir George Ogilvie, retiring after 37 years in the Indian Service, declared that nothing short of federation of the independent principalities would unite the whole of India.

Men and women under 35 years of age held a junior conference on Imperial affairs in London. Great Britain, the Dominions, India and the crown colonies were represented.

Chief Inspector William Barker, known as one of Scotland Yard's cleverest wit, retired at the end of December. He has played a big part in solving many notable crimes.

The London Sunday Referee (Conservative) declared Winston Churchill, veteran Conservative, had accepted an invitation from Prime Minister Chamberlain to replace Viscount Swinton as secretary for air.

Great Britain built more cruisers in 1937 than in any year since the Great War, the naval officer of the Times of London said. He predicted 1938 would set a similar record for destroyers and submarines.

The Cuban government withdrew all charges against former president Gerardo Machado, of Cuba, who had been held by United States authorities in temporary custody on an extradition warrant.

ALICE STEVENS' RECIPES

APPLES MAY BE DRIED FOR WINTER USE

Have you looked over your supply of apples to see if they are keeping all right? Sometimes you will find a few of the early varieties showing signs of decay. Even if only two or three apples are affected, you will be surprised how quickly the trouble will spread.

Pick over the apples and remove all the spoiled ones. Great care should be taken in handling the apples. Careless handling will cause more bruises.

Apples should be stored in a dry cool place and away from light. If your storage space is not satisfactory, it might be wise to dry a few apples. Putting them in jars, using the Cold Pack Method is also advised. This applies particularly to the earlier varieties of apples.

DRYING APPLES

Peel and core the apples. Cut the apples into rings about 3/16 of an inch thick. Place the sliced apples on a large piece of cheesecloth. Gather up the corners of the cheesecloth, so that a large bag is made. Lower into a pot of boiling water for half a minute. This stops the enzyme action and the apples do not discolor.

Allow the apples to drain and spread an even layer on a cheesecloth. Place in the warming oven. If a clothes rack is available, spread some wire netting on this and cover with cheesecloth. Place the apples on this improvised screen and let dry at room temperature. With the usual heat in the kitchen, the apples should dry very quickly.

Readers are invited to write to Alice Stevens' Home Service for free advice on home cooking and household problems. Address letters to Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man.

Annually, more than 400,000,000,000 tons of mud are carried into the Gulf of Mexico by the Mississippi river.

To be proud of learning is the greatest ignorance.

FLIN FLON

"The Story of Its Finding and Position To-day"

By PRATT RUEN

What surprised me in some days of observation was the springy healthy walk and appearance of the men, both underground and above ground workers.

They didn't seem fagged out as so many city people do. Part of this is of course attributable to the fine air and elevation of Flin Flon, and to simple food, but much must be due to conditions under which they work. That's the way I thought, so permission (rarely given) was sought to "go underground" and see actual mining from that angle. I wanted to go in the afternoon but was told blasting was done at 4:20 and the men cleared before 4, so that was out. Frankly I'd rather be above ground while blasting is going on below!

However, next morning at 8 sharp I presented myself at the office and was escorted by A. A. Koffman of the Chief Engineer's office to the Supply Department, where I was fitted (over my clothes) with long rubber pants, rubber smock and miner's helmet for all the world shaped like a war helmet, only made of a transparent substance, like horn, light, but very strong. Long laced rubber boots were put on over extra heavy woolen socks, and I was ready. By the way, these rubber boots have steel toe-caps inside for protection.

Carrying an acetylene gas lamp (which is filled just before going into the shaft and always carried lit except when in elevator) my guide took me below and showed me all the workings or as I asked him took me of every kind.

The Elevator Drops 1,200 Feet A Minute

The big main elevator, by the way, is a double decker, carrying 20 men on each floor and dropping down the shaft at 1,200 feet per minute.

The big ore elevator carries a five ton bucket which is loaded with ten tons of ore and rises 1,800 feet a minute. During busy times it will raise and dump this 10 tons of ore every two minutes. Some speed and precision needed here to avoid accidents!

Well, we're down the mine, and I'm astonished at finding it all electrically lighted, plenty high to walk up right and very clean underneath. In fact I didn't stumble all the time below, although those rubber boots with extra heavy soles felt like boots, not boots, on my feet!

The acetylene lamp is lit by spinning a flint like a cigarette lighter, and shows an unprotected flame no more than 10 inches long. There's no free gas in Flin Flon mine.

Everywhere we went, ore seemed to be crushed and blasted away and raked along tunnels into holes that went DOWN, always DOWN.

The acetylene lamp is lit by spinning a flint like a cigarette lighter, and shows an unprotected flame no more than 10 inches long. There's no free gas in Flin Flon mine.

Here, little trains of five cars with a workman and a conductor, act under each hole and loaded up, then spun away to an auto-trip through the door, killing the ways and unloaded it into a hopper from which the big ore elevator carried it to the top.

Test plant, 1928. Power plant and stack at Flin Flon situated at what is now the centre of the Open Pit Mine.

Next week we get out of the mine and see the above ground processes as carried on at Flin Flon, Manitoba.

Military Controls Industry

Chinese Pass Strict Rules For Duration Of War

The Chinese government has placed control of industry and agriculture in the hands of the military affairs commission and decreed death for employers or workers who try to resist supervision by closing their enterprises or agitating for strikes.

The military affairs commission, headed by Premier Chiang Kai-Shek, has supreme control for the duration of the war.

Too Haughty With Gun

When Robert Micas, 57 years old, a magazine salesman, rapped at the door of 27-year-old Mrs. Lucille Shaghey's home in Equality, Illinois, she asked, "Who is there?" Micas, a dead mute, could not answer. After warning, "If you don't answer, I'll shoot," Mrs. Shaghey emptied a shotgun through the door, killing the salesman instantly. The housewife was held for the grand jury.

The most servicable of all assets is reputation.

How Diamond Drilling Is Done. A Complete Underground Workshop

We went back up and down between levels in small elevators, being just an operator and two or three men who religiously mapped out their acetylene torches and they got on and rift them on leaving.

How and why was diamond drilling done? Down we went, along a narrow winding passage in the solid rock, lots of water underfoot here, and at the end the men who shut off their diamond drill (run by compressed air) to talk to us. First (thing I wanted to know) was why the water? and found it was injected to the point of the drill to keep the diamonds wet and cool.

The idea is to run holes up-down-and sideways from the little shaft sunk directly in the ore vein, and as the drill is hollow, take out cores of ore, place them in long half round boxes marked with the exact position they're taken from, how deep the drill was in, etc. Then up in the engineer's office they can figure exactly how wide the actual ore is and multiply up by known averages till they can tell you how much ore of how much value and containing how much copper, zinc, gold and silver there is in their mine.

Another thing I found out was that is it costs real money to sink shafts, therefore all sinking is done in paying ore except when the shaft is necessary like the passenger one, which will stay in the same position permanently. The small elevator shafts, being in ore, will eventually be cleaned out and filled up.

This thing up is interesting. At Flin Flon it's done with sand, and literally millions of tons have already been hauled 16 miles and poured and tamped into empty and filling workings.

The sand train never stops hauling, day or night, making at least six trips in the 24 hours, because sand is also used in the smelter. But hold on—I'm still below ground and I've got to get up!

Before I ring for the elevator I want to see the man who drills and blasts the ore and here he is with a companion and an air compressor, drill on a shelf over what seems an immense void of blackness, and that's just what it is, an immense funnel in the rock.

The miner drills his holes, always downward. Dynamite is placed and exploding in the afternoon, his shaft to put to work and gas blown to the surface, then back to work again to repeat.

On many levels the same operation is taking place, but nobody overlaps, and the ore pours down steadily.

One thing outstanding to me was the small amount of hard physical labor I saw done. Everything was controlled by compressed air and electric power, and another thing was that every time you went down in the mine you said, "Hello." You may have come down on an elevator with him five minutes before, but you said "Hello" just the same. Nobody knows why, but it's a check.

Way down on the 1170 level where we stepped into as complete a machine shop as you could want, see about 10 or 12 mechanics working, lighted as bright as day and all carved out of the solid rock. It did look strange in this permanent room to see the helmets on every man, but there they were. No machinery, saws, chisels were taken in order to avoid accidents.

Working thus right down in the mine is an economy, because the hauling of materials to the surface and back is mostly by means of water, besides holding up other operations while the elevators are blocked.

STYLE-WISE APRON FAIR HELPS YOU PROTECT YOUR PROCKS!

By Anne Adams

Cut for action... Tailored for chic—these two tidy aprons that every busy housemaker will be proud to own! And if you're hunting for a design that's easy to cut and stitch, look no further than Pattern 4678. Like a pretty model that will help you when you're hostessing? Then make style "A" in dainty dainty or style "B" in elegant elegance with a crisp bit of organza ruffling, and finish off its handy pockets with four eye-catching buttons. Model 1 is a winner when it comes to finishing up kitchen chores—and 'tis indeed a cheery sight if you choose a polka-dotted percale.

Pattern 4678 is available in sizes small, medium and large. Small size takes 2 yards 36 inch fabric for each apron and apron A, 1 yard ruffling illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

In A Generous Mood

An amusing advertisement appeared in a Montreal newspaper recently. It said: The elderly Scotsman celebrating St. Andrew's Day in vicinity of Peel St., 11:30 p.m., seeks the return of his watch and chain, pipe and pouch, set of teeth and wallet. Probably given away in a generous moment. All expenses connected therewith will be met.

"Do you mean to say that Sandy is famous for his after-dinner speaking?"

"I'll say. He always manages to be speaking on the telephone when the waiter brings the check."

Royal Bank of Canada Reports Good Year

Total Assets \$869,538,000 up \$14,000,000 — Deposits Increased \$10,000,000 — Liquid Assets 65.53% of Liabilities to the Public — Increased Profits Shown

The Annual Balance Sheet of the Royal Bank of Canada made public shows a moderate growth in deposits and total assets and a strong liquid position. Total deposits amount to \$756,689,496 and are higher than at any period in the bank's history, with the single exception of 1929.

Commercial Loans Increase

Current Loans in Canada, including loans to Municipalities and Provincial Governments, amount to \$200,583,727, an increase of approximately \$12,475,000 as compared with the previous year. Current Loans outside of Canada amounting to \$101,147,185 are approximately \$4,000,000 lower than last year. Coming as it does after a steady decline in current loans over a period of seven years, the reversal in the trend of commercial loans is encouraging. As might be expected in view of the present stock market situation, Call Loans both in Canada and abroad have been substantially reduced. Call Loans in Canada amount to \$19,392,906, a reduction of approximately \$6,700,000. Call Loans abroad amount to \$10,070,583, a reduction of \$4,500,000.

Strong Liquid Position

The liquid position is strong, total readily realizable assets being \$514,671,335. Of this amount \$148,628,928 is represented by cash on hand or on deposit with the Bank of Canada and

other banks, while \$245,606,374 is represented by Dominion and Provincial Government securities. Public securities other than Canadian amounting to \$25,927,482 show an increase of \$15,837,353. This increase is understood to be represented in United States and British Government securities. Total investments amount to \$316,568,917, an increase of \$23,398,096 from the previous year and a new high record in the history of the bank. Total liquid assets are 65.53% of liabilities to the public, which, of course, is a reflection of prudent conditions rather than of deliberate policy. No doubt the bank would have been glad to have replaced a considerable proportion of its investments by commercial loans.

Profits Higher

Net profits for the year are shown at \$3,711,379 and compared with 1936 indicate an improvement of \$207,138. Dividends paid absorbed \$2,800,000. The annual appropriation of \$240,000 made for Bank Premises but the contribution to the Pension Fund Society was increased to \$300,000 as compared with the former appropriation of \$200,000. Balance of Profit and Loss account carried forward totals \$2,325,176, an increase of \$411,380.

The Annual General Meeting of the Shareholders will be held at the Head Office of the bank at 11 a.m. on January 15, 1938.

SUNDAY SCHOOL LESSON

JANUARY 9
PREPARING FOR A LIFE OF SERVICE

Golden text: Make ye ready the way of the Lord. Mark 1:3.
Lesson: Mark 1:1-13.
Devotional reading: Isaiah 40:3-11.

Explanations And Comments

The introduction, verse 1. Here begins the gospel, the good news, of Jesus Christ, the Son of God. Thus Mark introduces his Gospel omitting all reference to the birth, infancy and youth of Jesus.

Jesus Prepares for a Life of Service, verse 9-13. In those days Jesus came from Nazareth of Galilee and was baptized by John in the Jordan. John's baptism was "of repentance unto remission of sins"; why did Jesus, who was sinless, seek baptism? Several reasons may be given. His baptism was a public endorsement of John as a messenger of God. It was a testimony to his followers that he would himself submit to it. And it was for him a formal setting apart, a consecration for his great mission.

At such as Jesus ascended from the water ("straightaway" is one of Mark's favorite words), he saw the heavens parted. Dr. P. H. Meyer observes that Jesus saw the heavens opened just as when Newton discovered that its laws constituted the heavens was opened to him. And Jesus saw the Spirit as a dove descending upon him. The words indicate his being filled with the Spirit of God and consecrated for his ministry.

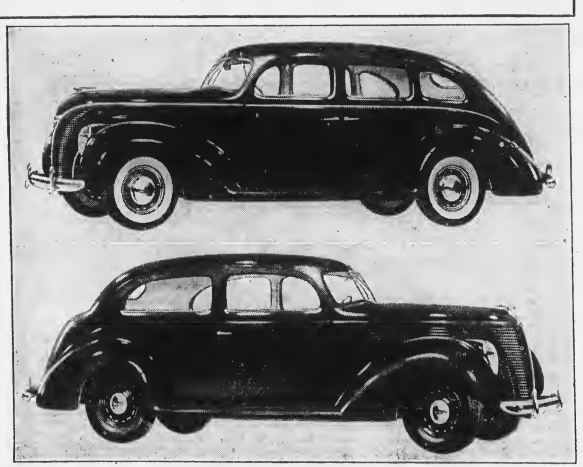

The manifestation was through sense or apart from sense. In greater measure than before he "tasted his divine Sonship and his Father's pleasure." His self-consecration was rewarded as one's

A Welcome Guest

Did you ever stop to think that people read newspapers because they want them? The newspaper is not forced on anyone. People pay for it, and pay regularly. Whole families await it eagerly and content good-naturedly over their individual turns to read it. Each praises and criticizes it as one is prone to criticize the other members of the family. The good newspaper is a definite part of the family. That is why its sales force is immeasurable. Door to door salesmen use all kinds of ingenious devices to get inside the home. But the newspaper is invited in. Its advertisements are considered a part of the messages. The newspaper is so definitely a part of the people, so much an accepted member of the family, that its papers constitute the finest and least expensive advertising medium yet devised.

The honeymoon is over when the bride complains of the noise the husband makes in getting his breakfast.

Two New Ford V-8 Cars for 1938

FORD MOTOR Company of Canada, Limited, announces the new Ford V-8 cars for 1938. For the first time Ford presents two distinct lines, the De Luxe Ford V-8—a big luxury car—and the newly styled Standard Ford V-8.

The De Luxe Ford V-8 car is entirely new in appearance, longer, roomier and more streamlined. The front design is modern and distinctive. Fenders are deeper and

more massive. The rich interior appointments of the car match its outstanding exterior. Longer bodies provide more room and comfort and there is larger luggage space in all models. The De Luxe car is powered with the proved 85 horsepower V-8 engine. Shown above (top photograph) is the De Luxe Ford Sedan. The Standard Ford V-8 for 1938 brings new styling with a longer hood and flowing curves. Interiors are spacious and neatly appointed. New features include the hood recessed for safety. The radiator grille louvers continue back into the hood to prevent smothering body lines from bumper to bumper. It is built on the same 112-inch wheelbase as the new De Luxe and has the famous Ford V-8 engine. The new Standard Tudor Sedan is shown above (lower photograph).

A Body Builder

WHEN you feel out-of-sorts, when you've no appetite, or stomach gives trouble, with gas or acid indigestion, why not try Dr. F. J. Golden's Medical Discovery? If you want to put on healthy flesh—this is the tonic for you. Read that Mrs. Frank Lanthier, North St., St. Catharines, Ont., I said: "I had no appetite, was underweight, didn't sleep well at night and after eating I suffered a good deal with acid indigestion and gas. Dr. F. J. Golden's Medical Discovery soon had me feeling better again. My appetite improved, my digestion was better and I was much stronger. It's a great blood tonic. Sold by druggists."

WHAT HO!

—By—
RICHARD CONNELL

By Arrangement With Thomas Allen, Publisher, Toronto.

CHAPTER IV. Continued

"It's a spotted dog," said the earl of the pudding. "There are two kinds of spotted dog, whispering and shouting. We call it whispering when the sultans are close together and shouting when they are far apart."

Ernest said mechanically, with only a dim sense that the food was good; for it was a dream meal. He would hardly have noticed it had the soup been ink, the fish flannel and the pudding sawdust. I am lurching with the Earl of Bingley and Lady Rosa and I'm going to stay here with them—he kept thinking. He donned his best formal manners. The earl was anything but formal. Conventually he was a bit difficult to follow. His technique was that of a hungry hen in a field of crickets. He would sounce at a subject for only a few seconds, see another more to his liking, go for that, and then he'd off in pursuit of something entirely irrelevant.

"Hobbies," he said, suddenly. "I beg your pardon, sir?" said Ernest.

"Hobbies," repeated the earl. "I have 'em. Captain Duff-Hooper has 'em. He collects pipes and horses. My daughter is a regular little dandy at twiddling with machinery. She's a gadget-hound. I have many interests: flowers, photography, ventriloquism, buttonholes, and a collection of buttons of all sorts. What do you do, Mr. Bingley?"

"I'm a taxidermist," said the earl. "Fascinating," said the earl. "Isn't it, Esme?"

"Oh, quite." "Have you any examples of your work with you?" the earl asked.

"Now, father," said Lady Rosa, "you could hardly expect Mr. Bingley to go around with his pockets full of stuffed totentiks."

"He could if he wanted to," said Ernest. "Couldn't you, Mr. Bingley?"

"I suppose so," said Ernest. "You see?" said the earl. "Of course he could. Perhaps you have some pictures of your work about you."

"Well," began Ernest, shyly. "He has!" exclaimed the earl. "Out with them, please, Mr. Bingley. I'm exceedingly partial to pictures."

Reluctantly Ernest took from his wallet the photograph Mr. Sloum had taken of him aboard the horse Tartar. He handed it to the earl, who studied it with interest.

"You ride bare-back in the States, I see," said the earl. "That takes talent."

"I don't ride at all well," said Ernest. "See you," said the earl.

He passed the picture to Duff-Hooper.

"The beast's conformation is passable," was his verdict.

"As Master of the Pennyton Hands you might invite Mr. Bingley to lunch with you," suggested the earl.

"Yes, yes certainly," said the earl. "Go to lunch to meet you, Bingley. I've a new Irish hound—Fin McCool—and I'm not sure what he can do. Perhaps you'd care to test him over some of our jumps, Bingley."

"No, thank you," said Ernest. "You're very kind, but no thank you."

"Oh, but you must hunt," said the earl. "Bingley tradition, and all that."

Ernest decided that this was one Bingley tradition to which he would not adhere. He was far more at home with deceased than live horses.

"Are the red Indians in your part of the country hostile?" the earl inquired.

"Oh, no, sir. In fact I know only two—one is a bookkeeper, and the other sells brushes."

"Bit of a come-down from war-whoops and scalping, what?" commented the earl.

When the spotted dog had been reduced to a pup, and the earl had finished his fourth demi-tasse, he said, "And now, Mr. Bingley, I suppose we'd better have our little talk, eh?"

Ernest had read in society novels how the ladies retired after eating and the men sat at table exchanging unpurged anecdotes until the more or less enthusiastic "Shall we join the ladies?" was pronounced.

He said, "Yes, sir. Of course."

"Would you mind stepping into my study?" the earl said. "We can be absolutely private there."

This remark puzzled Ernest. He was no necessity for absolute privacy, unless the earl's post-prandial stories were of such a nature they might shock the servants.

"Whatever you say, sir," Ernest assented.

"Crump, kindly show Mr. Bingley into my study," said the earl. "I'll be there directly."

"Very good, m'lord. Will you come with me, sir?"

With a bow to Lady Rosa, and a quarter-bow to Duff-Hooper, Ernest withdrew and was shown into a small comfortable room, with sporting prints on the walls, and some books, mostly Jorrockses, Somervilles, and technical notes on horsemanship, warfare against garden pests, and the care and feeding of dogs.

While waiting for the Earl, Ernest sat about the business of collecting his thoughts, which were as tangled as a dozen cats in a pail, and hobbling his runaway emotions.

Under the spell of Rosa he had agreed to stay, and for a whole month, perhaps. He was still under her spell as he sat there in the study.

Just the thought of her, the echo of her voice, the remembrance of her smile caused those clation palpitations, that state of elation and despair, that ecstatic and goofy loss which are the well-recognized symptoms of a very old and universal complaint which attacks young men, and sometimes older men. Its germ has never been isolated, no antidote for it is known. When a man gets it he can't be cured, and what is more, he doesn't want to be.

However, certain hard and thorny facts pushed their way into Ernest Bingley's moony mind. He had no wardrobe for an extended stay at the castle. And yet, a month under the same roof as Rosa, and that roof of Bingley Castle—how could that be valued in terms of taxidermy, gold, or anything else?

Opportunity, Ernest felt, had not only knocked, but had broken down the door, marched in, and stood by the collar. He remembered Rosa had said she liked his kind of mind. He remembered that she had called him "Cousin Ernest." He remembered—and then the Earl of Bingley began to study, and the earl's countenance illuminated by a Pickwickian beam.

"My daughter has told me the good news," he said. "Delighted you like it here. Now, shall we talk Larky?"

Seeing Ernest's surprised expression, the earl said,

"I picked that up in the cinema. A police character in one of your films was always inviting people to talk Larky. I took it to mean 'let us be frank.' Now, by nature, man, frank; too, too frank my daughter often says. I shall not beat about the bush but shall grasp the bull by the horns. As an American businessman I know that you want me to come clean, what?"

"Why, yes," said Ernest.

"Well, just fix up the terms then," said the earl, briskly.

"I promised Rosa I'd be business-like," said the earl. "There'll be

DISLOCATED ELBOW
LED TO NEURITIS

Could Not Straighten Her Arm

Four months ago, this woman dislocated her left elbow. She was far from well, and she developed neuritis and could not straighten her arm. She was ordered to take Kruschen—with the happy result described in this letter:

"I had an accident four months ago and my elbow was seriously dislocated. Fortunately, it was set right there and then, but afterwards, I could not straighten the arm to its full extent. It was X-rayed, and the surgeon told me I was inclined to be rheumatic. I was ordered to take Kruschen Salts—one teaspoon in a glass of hot water on waking. Now I am getting along famously. The pain in my elbow is better, and daily, I am able to extend the arm more easily." (Mrs. F. P. R.)

Rheumatic conditions are often the result of an excess of uric acid in the body. Two of the ingredients of Kruschen Salts have the power of dissolving uric acid crystals. Other ingredients assist Nature to expel these dissolving crystals through the natural channels.

papers and so on to sign, I suppose; but my solicitor will draw them up and send them on to you in due course. Of course no legal documents are necessary between you and me. Any Bingley's word is as good as his bond, and in my case a joy might better."

Ernest felt that his education in English manners and customs was progressing with giddy swiftness. He had read, with envy, of long stays at English country houses, but could not recall that any mention had been made of a legal contract as a preliminary to such a visit. Ernest waited for the earl's next words, never a very long wait.

(To Be Continued)

Economic Conference

Proposals for World Currency Equalization Fund

Proposals for creating a world currency equalization fund and for mobilization of frozen credits are understood to feature a report on world economic conditions, about to be made public by ex-Premier Paul Van Zeeland of Belgium.

The report, based on study which Van Zeeland undertook at the request of the British and French governments, is expected to suggest immediate opening of negotiations among Great Britain, the United States, France, Germany and Italy, with the object of convoking an international economic conference.

Van Zeeland's concrete conclusions, as embodied in the report, are understood to have already received the virtual approval of British, American and French authorities.

Van Zeeland's report is believed to point to establishment of an international economic study centre as proposed several months ago by King Leopold of Belgium in a letter to Van Zeeland.

University of Manitoba

Asks For Additional Grant In Order To Maintain Service

The annual report of University of Manitoba board of governors, tabled in the Manitoba legislature, stressed the need of additional grant of \$200,000 annually.

The report, tabled by Hon. Ivan Schultz, minister of education, decried restoration of salary reduction in the university as absolutely essential if the college was to retain a competent staff. Because of the keen demand for capable professors in Canada and United States, the university has lost several valued members of the teaching staff, the report said.

Restoration of the cuts to the level of September, 1932, would require \$100,115. Other present financial needs are \$25,000 for library, laboratories, supplies and equipment; \$20,000 for research projects and \$50,000 for new members of the staff.

Attacked By Panther

Malay Native Found Jungle Pool Was Not A Refuge

A jungle pool was the refuge from a black panther which was pursuing an Indian in the Malay jungle of Perak recently. The panther, however, followed him into the water, and seized him by the hand. A terrific struggle followed, but finally, the native exerting all his strength, managed to hold the animal under the water long enough to drown it. He is now being treated in hospital for a badly-mauled hand. The panther is being stuffed.

There will be no British government booth in the 1938 Paris International Exhibition owing to the Empire Exhibition to be staged at Glasgow.

A large armament concern of Prague, Czechoslovakia, is establishing a branch in Brazil.

Health LEAGUE OF CANADA
presents
TOPICS OF VITAL INTEREST
by **DR. J. W. S. McCULLOUGH**

ARTICLE NO. 22
Cancer And The Human Race

Doctor Bonne, professor of pathology in the School of Medicine, Java, writes some interesting things concerning the incidence of cancer in the extremely primitive, the simply primitive and the eastern races with whom he is acquainted.

Examples of the extremely primitive are the pygmy Papuans of New Guinea and the aboriginal Indians in South America. No missionaries, no government, no money, no nails nor civilization. Among such are reached these people. They live at the night of a white man. As to disease among them we haven't the faintest idea.

The simply primitive are those who reach of government, trade and civilization. Among such are the coastal Indians of the Guianas in South America, many negro tribes in Central Africa, the Dajaks of Central Borneo, and the aboriginal population of Australia.

The missionary and the government doctor sees little or no cancer among these people, not because they do not have cancer but because they consult a doctor with great reluctance. Cancer is not often seen among them; neither is diabetes, humpback, cirrhosis of the liver and many other internal diseases. As the belief in evil spirits dies away and these people consult a doctor cancer of the genital organs or the mouth is discovered.

The general mortality among the eastern nations is much higher than in Western Europe and North America. The chance of dying young is much greater. Consequently the number of persons of advanced (cancer) age are less than in Western civilization. Fewer are left to have cancer. Dr. Bonne, from his vast experience among the people of the East, finds that there is a remarkably high frequency of primary liver cancer in various parts of the tropics.

Primary cancer are almost totally absent among the native Malay population of Java, but that cancer of the skin of the legs is common in male Malays. He concludes that when the cancer rate in the East is recalculated for a population of standard age, the total mortality is in accord with the usual figures for Western countries. The information available about the incidence of cancer indicates that it is a disease of rich and poor, white and black, brown or yellow; that races and people all over the world have cancer in about equal proportions.

Next article: Cancer of Lip and Mouth.

Editorial Note: Readers desiring the complete set of Dr. McCullough's cancer articles at once may secure same by writing to: Health League of Canada, 105 Bond St., Toronto, Ont.

A Surgical Emergency

London Doctors Gave Patient Treatment With Her Own Blood

Drs. C. J. Siggers and Eric Ashman, of the Crofton General Hospital, London, were about to operate on a 34-year-old woman patient. Immediately after they gave her an anesthetic, she had an internal hemorrhage. Three pints of stagnant blood collected in her body. The doctors' dilemma: the patient needed an operation, but it would kill her if she didn't have more blood. No donors were available. So the patient became her own donor. The surgeons took three pints of blood from her body, strained them through sterilized gauze to eliminate clots, injected them back into her arm. The operation succeeded—The Newswreck.

Denmark's shipments to Germany in the last year were \$8,000,000 greater than expected.

A great many men reason in a circle; that's why there is no end to their argument.

AUDITORS' REPORT
To the Shareholders, THE ROYAL BANK OF CANADA
We have examined the above Statement of Liabilities and Assets as at 30th November 1937, with the books and accounts of The Royal Bank of Canada at Head Office and with the certified copies of the financial statements of the branches. We have also examined the cash and investments held by the Bank at the date of the statement, and we find that the figures shown in the Statement are correct and that the assets are sufficient to cover the liabilities.

W. G. THOMSON, C.A., of Peat, Marwick, Main & Company, Auditors.
M. OGDEN HASKELL, C.A., of Haskell, Robertson & Company, Auditors.

Montreal, Canada, December 22, 1937.

Little Helps For This Week

O Lord be gracious unto us, we have waited for Thee. Isaiah 33.2.

He never comes too late. He knoweth what is best; Vex not thyself in vain; Until He cometh, rest.

We make mistakes, or what we call such. The nature that could fall into such mistakes needs, and is given, the living of it out. In the giving and patient living of it out we come to find that we have not fallen into hopeless confusion of our own ignorant making, but that the finger of God has been at work among our lives, and that the emerging is into the light of that which He is forever making up for us our own undoings, and that He makes them up before-hand. The Lord knows how to make stepping-stones for us of our defects even, it is what he lets them be for. He remembers in the making that we are but dust, that the dust of earth, and that He comes to make something out of it just a little lower than the angels.

Woman is resourceful. Ultimately she will find ways to open cans and cut kitchen linoleum with the new electric RASOR.

Good Advice

Doctor Tells How To Attain Healthy Old Age

Dr. W. A. McKeever, who runs a school for persons over 70 in Oklahoma City, knows how to live to be a hundred. Says he:

Eat three light meals a day and alkaline foods.

Have a job you like.

Have lots of friends and read the newspapers for current affairs.

Stop grumbling and don't talk about old age or pains. Don't preach against the younger generation. Get out with the young people. Dance a jig.

Don't sleep more than six hours a day. Have so many interests you need the extra time to pursue them.

Men are like shoes. The cheaper they are the more they squeak.

California has 24,780 registered beauty experts or cosmetologists.

STOP Itching

TORTURE IN A Minute

For quick relief from the itching of eczema, hives, skin eruptions, etc., apply Dr. Brown's new, soothing, and non-irritating skin cream, ointment and salve. It is the only preparation that gives instant relief. A 30¢ trial bottle, at drug stores, gives you money back. Ask for D. O. D. PRESCRIPTION.

"WHERE YOUR TIME IS OUR TIME"

Good Business

HERE are those who would no more go to their stores with patched pants than they would attend church with dirt behind their ears, who still use printed forms fit only for the waste basket.

WHY a business man will drive a good car, smoke the best cigars, put on a bold front at his bank, and then shop for the shoddiest, cheapest printing, is beyond the understanding even of an organ-grinder.

ONE'S business pride is as much exposed by his letterhead or printed statement as his character is revealed by his words or personal appearance.

THE poorest economy known to a going concern is punk printing, smeared all over with the evident fact that the job finally went to the lowest bidder.—Clayton Rand, in C.W.N.A. Bulletin.

Local News

Audrey Dunlop returned to her school at Hardisty on Friday. Miss Prue Borden spent the Christmas holidays in Calgary.

Raleigh Martin, of Barons, was the guest of Alwyn Haysom over the week-end.

Helen Dibblee returned to the Normal school in Calgary on Sunday.

Miss Margaret Hendricks of Lomond spent the new year's holiday with Helen Webster.

Born To Mr. and Mrs. Cecil Milley on Thursday, December 30, a son.

Mr. and Mrs. Tom Smith of Lethbridge were new year's visitors at the home of Mr. and Mrs. Peter Smith.

Gwen Dunlop left on Sunday to resume her studies at Garbath's Business College in Calgary.

Miss Edith Haysom was the guest of her sister, Mrs. J. Morgan of Pincher Creek, during the holidays.

Dick Borden, who has been attending school at Victoria, will return shortly to resume his studies.

Mrs. T. M. Brown of Spring Point and Mr. Dick Everett of Pincher Creek, are the guests of Mr. and Mrs. T. Holstead this week.

The annual meeting of the parishioners of St. Alban's church will be held in the parish hall at 8 p.m. on Tuesday January 11.

Trustees of the Pass schools decided on Monday, January 3, as the re-opening date following the Christmas holidays. But though teachers were on hand, very few pupils came. The reason was that an unauthorized announcement appeared in a mimeo sheet which stated that schools would open on Tuesday. Coleman trustees requested The Journal to state that arrangements were decided on at a meeting of Pass trustees before Christmas to re-open on Jan. 3, and all teachers were so advised. Miss Yuill of West Coleman school assembled her pupils and with her staff classes were carried on as usual.

Installation Officers at Rebekah Lodge

P.D.D.P., assisted by Sister M. Ford, installed the following officers for 1938. At this meeting three P.N.G.'s received certificates.

Jr. P.N.G. Sister C. VanDuzee; Noble Grand, Sister D. Colongra; Vice-Grand, Sister M. Duffield; Rec. Sec., Sister M. Holstead; Financial Sec., Sister M. Fraser; Treasurer, Sister A. Vincent; Warden, Sister S. Cornett; Conductor, Sister E. White; R.S. N.G., Sister M. Ford; L.S.N.G., Sister R. Dunlop; R.S.V.G., Sister E. Shields, L.S.V.G. Sister A. Nash; Chaplain, Sister M. Yates; L.G., Sister M. Surtees; O.G., Sister L. Boulton.

At the close of the meeting, refreshments were served and a social hour enjoyed by all present.

TAXES BURDEN OIL INDUSTRY

In the roll of national industry the burden of taxation has become a heavy load, but nowhere more onerous than upon the oil industry and users of its products.

There are no less than 200 types of taxation imposed upon it. They are collected on every operation of the business, from setting up its equipment in the fields, to selling gasoline and lubricating oil at the filling station. Every product and by-product from crude oil, from the moment it comes out of the ground and down through all the processes through which it becomes highly refined gasoline, fuel oil, and lubricants, is taxed.

Producers of crude oil and natural gas, for example, pay taxes on crude oil and natural gas as it is produced. There is a tax on oil withdrawn from

storage, on sales of oil, and gas lands, and on top of all these types of taxes, there are severance taxes, proration taxes, royalties, derrick taxes, anti-pollution taxes in a great many of the big fields, and well-drilling permit fees.

Refiners, of course, have to pay taxes on their refined products. Pipe line companies pay taxes on their

storage, on sales of oil, and gas lands, and on top of all these types of taxes, there are severance taxes, proration taxes, royalties, derrick taxes, anti-pollution taxes in a great many of the big fields, and well-drilling permit fees.

Refiners, of course, have to pay taxes on their refined products. Pipe line companies pay taxes on their
